Unit 1 4

Hello!

あいさつをして友だちになろう

Hello. / Hi. / I'm (Hinata). / Goodbye. / See you.

Unit 2 8

How are you?

ごきげんいかが？

How are you? / I'm (happy).

Unit 3 12

How many?

数えてあそぼう

How many (apples)? / (Ten) (apples). / Yes. / That's right. / No. / Sorry.

Unit 4 16

I like blue.

好きなものをつたえよう

I like (blue). / Do you like (blue)? / Yes, I do. / No, I don't. / I don't like (blue).

Unit 5 20

What do you like?

何が好き？

What do you like? / I like (tennis). / What (sport) do you like? / I like (soccer).

Unit 6 24

ALPHABET

アルファベットとなかよし

(The "A" card), please. / Here you are. / Thank you. / You're welcome.

Unit 7 28

This is for you.

カードをおくろう

What do you want? / (A star), please. / Here you are. / This is for you. / Thank you. / You're welcome.

Unit 8 32

What's this?

これなあに？

What's this? / Hint, please. / It's (a fruit). / It's (green). / It's (a melon). / That's right.

Unit 9 36

Who are you?

きみはだれ？

Are you (a dog)? / Yes, I am. / No, I'm not. / Who are you? / I'm (a dog). / Who am I? / Hint, please.

本書の使い方

学習指導要領で示された、教育課程全体を通して育成を目指す資質・能力の三つの柱に沿った各単元の目標と、関連する主な言語材料を記しています。下線は、新出の表現を示しています。

7 This is for you.

カードをおくろう

単元目標（全 通）

- 日本語と英語の音声の違いに気付く。形の正しい方、正しいものを尋ねたり答えたりする表現に慣れ親しむ。
- 欲しいものを尋ねたり答えたりして 伝え合う。
- 相手に伝わるように工夫しながら、自分の作品を紹介しようとする。

言語 科

○ What do you want? (A star), please. Here you are. This is for you. Thank you. You're welcome.

○ want, this, a, for, 状態・気持ち (big, small), 形 (square, rectangle, star, diamond), bus, flower, shop, balloon, house, car, candy, 動物 (dog, cat, panda, mouse, bear)

[既 出] like (blue). Do you like (blue)? Yes, I do. / No, I don't. I don't like (blue). What (spelt) do you like? How many (apples)? 形, 色, 数 (1 ~ 30), tree

このUnitで

いろいろな形を集めて作ったカードを贈る。

児童は、これまでの単元を通して、色や数、果物・野菜、身の周りの物などの語とともに、挨拶や好みを伝える表現に慣れ親しんできている。本単元では、まず、さまざまな形を表す語や何が好きかを尋ねたり答えたりする表現に出会う。次いで、それらの語や表現などを使いながら誰かに贈るためのカードを作り、紹介し合う。特に、相手意識・目的意識を大切にしない単元である。

単元の最終活動に向けて、第1時には、形を表す語に出会うとともに日本語と英語の音声の違いに気付く。デジタル教材より世界のさまざまなカードについて知る。第2時と

Let's Chant: What do you want?

What do you want? A red triangle, please. What do you want? A pink square, please. Wow! A house.

What do you want? A blue rectangle, please. What do you want? A black circle, please. What do you want? A black circle, please. Wow! A car.

What do you want? A yellow circle, please. What do you want? A green triangle, please. What do you want? A green triangle, please. Wow! A candy.

Let's Play 2

音声を聞き、正しい形をさがす。

まず、読面の中にどんな形がいくつか隠れているかを児童に尋ね、確認する。

デジタル教材や指導者が言った音声を聞いて、児童がその形を探し、指でさし示す活動。何度も繰り返し音声を聞かせ慣れ親しませることがある。

一人でゆっくり、ペアで行ったりして活動形態に変化を付けることで、児童の意欲も高まる。また、ペアの活動では、多様な方法（協力、競争、指導しなど）で楽しく活動させながら表現に慣れ親しませることにしたい。

慣れてきたら、児童に指導者役をさせる意欲も一層高まる。

(Let's Chantの解説は27ページに掲載)

各単元の特徴やねらい、指導上の留意点を解説しています。単元に入る前に読むことで、その学習内容の全体像を理解することができます。

各活動のねらいや内容、指導上の留意点について記載しています。授業の準備などに活用ください。

単元には、Let's Listen / Watch and Think / Play / Chant / Sing, Activityが設定されています。それらは主に、児童に言語や文化についての気付きを促したり、設定された言語材料の意味を推測したり慣れ親しんだりすることをねらいとしています。Activityは、既習表現などを使って、児童が友達とコミュニケーションを図ることをねらいとしています。なお、ここで扱われているワークシートは、全て文部科学省ホームページに掲載されています。

Let's Try! ①の誌面です。児童が実際に書き込んだり、これをもとに活動を行ったりします。

Let's Watch and Think

デジタル教材を視聴し、世界にはさまざまなリーディングカードがあることを知る。

映像を視聴することにより、さまざまな国は、それぞれの文化や習慣があることに気付かせたい。ただカードを紹介するのではなく、そのカードが使われる場面や状況、それがもつ意味などについても児童の気付きを促すようにする。体裁や渡す状況が違っても、どのカードも「相手のことを思って、自分の心を伝えるためのものである」ことに児童が気付くことで、最終活動が豊かになる。指導者は、そうしたねらいを明確にもち、映像を見せたい。

Let's Listen

欲しい形をやり取りする音声を聞き、誰がどの作品を作ったのかを考えて結び。

会話の中では、最終活動 Activityで使用するWhat do you want? ~, please. How many?などの表現が何度も繰り返し使われており、音声を聞きながら表現に慣れ親しむことが期待できる。

音声を聞く前に、どの作品には、どんな形がいくつか必要かについて児童に考えさせ、集中して主体的に関与するような工夫をしたい。

途中で音声を止めながら線を結びせたり、全ての音声を聞き終えてから線を結びせたり、さまざまな方法が考えられるが、児童の様子をよく観察し、実態に合わせた活動方法を選択したい。

Activity

いろいろな色の形を集めて、プレゼントするリーディングカードを作る。

まず、指導者がモデルを示し、ALTや校内の教員等に自分の気持ちを伝えるためのカードを作り、それを児童に見せ、意欲付けを図りたい。

まず、誰にどんな気持ちを伝えたいかを児童に考えさせる。対象を友達に限定する場合は、学級の中で、さみしい思いをする

Let's Watch and Think

① This is for you. Merry Christmas!
② This is for you. Happy Birthday.
③ This is for you. Happy Valentine's Day.
④ Thank you, Graham sensei. This is for you. Ah, so nice. My treasure.
⑤ What's this?
It's a nengyo, Japanese New Year's Card, from Ren in Kyoto. Look, this is Ren.

Let's Listen

1 先生: What do you want, Sayo?
さよ: Black stars, please.
先生: How many?
さよ: Two, please.
先生: OK! What do you want?
さよ: A big red circle, please.
先生: OK! What do you want?
さよ: A blue rectangle, please.

先生: Here you are.
さよ: Thank you.
2 先生: What do you want, Takeru?
たける: Small pink hearts, please.
先生: How many?
たける: Eight, please.
先生: OK! What do you want?
たける: Green triangles, please.
先生: How many?
たける: Four, please.
先生: OK! What do you want?
先生: Here you are.
たける: Thank you.
3 先生: What do you want, Emily?
エミリー: A big yellow star, please.
先生: How many?
先生: OK! What do you want?
エミリー: Nine green triangles, please.
先生: OK! What do you want?
エミリー: A brown square, please.
先生: Here you are.
エミリー: Thank you.

指導者用 例

How many triangles do you want?
(三角形をいくつか欲しいですか。)
𝌅 How many triangles can you see in this picture?
(この絵の中には三角形が何個見えますか。)

またActivityで使う表現例を紹介しています。

付属のデジタル教材に収録されている音声のスク립トを記しています。主として、Let's Listen / Watch and Think / Chant / Singです。

1 Hello! Greet and Become Friends

Lesson Objective (2 Hours)

- Let students realize about the various languages around the world, and have them get used to how to greet in other languages and English and say their names.
- Have students say their names and greet each other.
- Students try to say their names and exchange greetings In English and the other languages.

Language material

○ Hello. Hi. I'm (Hinata).

Goodbye. See you.

○Greetings (hello, hi, goodbye, see you), friend, I, am

Lesson Contents

Get to know and try to say students names in other languages.

For 3rd graders, they start their lessons with a new feeling as they begin studies and experiences that they didn't have in lower grades such as science and social science, calligraphy, recorder performances and so on. Especially with "Foreign Language Activities", for 3rd graders who are filled with curiosity, it can be something that fills them with interest and excitement. Especially for this unit that starts off the elementary school foreign language studies, it has an important meaning in affecting the direction of future activities. We want to make their first experience with "foreign language" enjoyable and leave an impactful impression.

First, students will get to know about the various conditions and languages of different countries around the world through the videos. At the current stage of development for 3rd graders, it is safe to say that they are still only aware of the world around them as the areas and places close to them. Therefore, through this activity, help students gain awareness that in the world there are many countries with various people going about their own lives, and that they are also living as a member of the same world as they are. Also, by letting students realize that there are many countries that use English and that it is a necessary skill, it can help students gain a higher desire to learn in the upcoming foreign language activities.

Script

Let's Watch and Think

- ① Finland フィンランド :Terve.(テルヴェ)
- ② China 中国 :你好。(ニーハオ)
- ③ Germany ドイツ :Guten Tag.(グーデントーク)
- ④ Japan 日本 :こんにちは。
- ⑤ Kenya ケニア :Jambo.(ジャンボ)
- ⑥ India インド : नमस्ते ।(ナマステ)
- ⑦ Korea 韓国 :안녕하세요.(アンニョンハセヨ)
- ⑧ America アメリカ :Hello.
- ⑨ Australia オーストラリア :Hello.

Let's Chant: Hello!

Hello, (hello,) hello, I'm Emily.
Hi, (hi,) hi, I'm Takeru.
Let's, let's, let's be friends!

●Points for teaching Foreign Language Activities to Elementary School Middle Grade Students.

Based on the education guidelines in the bulletin for the year 2008, with the lesson hours up until now for English activities as the main topic of discussion, foreign language activities for higher grade students were to be totaled to 35 lesson hours per year. With the year 2009 as a transition period, by the year 2011 the education guidelines previously mentioned has been effectively carried out in all elementary schools with the homeroom teacher as the main focus while having external support such as the ALT as assistants.

And so, based on the results and topics discussed regarding the education guidelines for foreign language activities in the bulletin in March 2017, it was decided that the same would be implemented for middle grade students due to the globalization of English education.

It is not as though the foreign language activities would go through a big change, but as stated according to the new education guidelines, the main aim would be to focus on the disposition of communication and the nurturing of the abilities of students. Through the 3 main language activities of "Listening", "Speaking", and "Presenting", the said aim can be achieved.

(Continues in Pg.7)

The main activity of this lesson is to have students greet and introduce their names to each other. Through this activity, students will get to know about the various meaningful names of one another and hopefully understand the importance and irreplaceable existence that each of them have. In addition, through enjoying communication and exchanging greetings, it should lead to better relationships within the classroom.

Let's Watch and Think

Listen to various world greetings.

- ★ When considering the current stage of development for 3rd graders who are only still aware of the world around them as the areas and places close to them, the exact idea and concept of foreign countries and places should be quite difficult for them. Through allowing them to experience these first encounters with the use of digital resources, it can become the trigger for students to gain interest towards foreign language and culture.
- ★ By letting students listen to the audio of world greetings, they will realize that there are various languages around the world. It would be good to let students say out whatever greetings they heard in the audio. It can be interesting for students to take note that different people might hear things in a different way.
- ★ Have students think about the various characteristic similarities and differences between the scenery and lifestyle of the different countries shown in the digital resources, as compared to Japan. Help students gain awareness that in the world there are many countries with various people going about their own lives, and that they are also living as a member of the same world.
- ★ It is also possible to consider using the internet to show students the various situations of other countries to gain their interest.

Let's Chant: Hello!

- ★ Have students enjoy and get used to the expressions by thinking about gestures they can do while greeting. After they are used to it, have students do pair activities and exchange names with each other and take turns saying it to help them gain further interest.

Let's Listen

Listen to the audio and connect the dots from the country flags to the children.

- ★ In this activity, students listen to each of the character's greeting in both their own language and in English, then try to match them with their respective countries. Have students' first try to guess the answer in advance. Students will concentrate on listening even more when there is a need to do so to know the answer.

As sounds of foreign names might be a bit difficult for students, the aim of this activity is not to catch the names accurately. Aside from having them get to know the expressions for saying their own names, students will get to know about the various meaningful names of one another and hopefully understand the importance and irreplaceable existence that each of them have.

Activity

Greet, make pairs and say your names.

- ★ This is an activity where the teacher and students actually greet one another and say their names. Although they are friends who always spend time together, by greeting and saying their names to each other, it can be a fresh experience for the students. It is a chance for students to interact with people and rediscover the joys of communication.

- ★ Depending on the situation of the students, it might be a good idea to make name cards for students to exchange when doing their greetings and introducing themselves.

指導者の表現例

Let's start our English class.
(英語の授業を始めましょう。)
That's all for today.
(今日の授業はこれで終わりです。)
Stand up, please.
(立ちましょう。)
Sit down, please.
(座りましょう。)
Good morning, everyone.
(皆さん、おはようございます。)
See you[next time / next week].
(また[次回 / 来週]会いましょう。)

Let's Listen

1. USA, 2. Kenya, 3. Korea, 4. Argentina, 5. Germany, 6. China

Script

Let's Listen

- Hello. I'm Olivia. I'm from America.
- Jambo. Hello. I'm Jomo. I'm from Kenya.
- 안녕하세요. (안녕하세요) Hello. I'm To-yun. I'm from Korea.
- नमस्ते। (ナマステ) Hello. I'm Anita. I'm from India.
- Guten Tag. Hello. I'm Leon. I'm from Germany.

Unit 1

Activity

あいさつをした友だちに名前を書いてもらおう

(5ページの続き)

However, although we say that foreign language activities will not be going through a big change, it would be necessary to adjust the topic content and activities to suit the conditions of the students who are now middle grade students.

By the way, although this column covers points, activities and English expressions for teaching foreign language activities to elementary school middle grade students, a lot of it can be also used and understood by foreign language studies for higher grade students.

- ★ Creating a setting where it is necessary to listen or speak using the vocabulary or expressions

Instead of easily giving students the Japanese meanings of the new vocabulary or expressions, allow students to guess the meaning by constantly letting them see or hear its usage in a necessary situation. Therefore, the aim of the "Let's Watch and Think" activity that can be found in all units of this textbook is to allow students to make their own deductions and think for themselves through the use of watching the digital resources.

Also, it is equally important to use this activity as a reference to judge the condition of a class and create a suitable environment for students.

- ★ Getting students familiarized through using words

It is often said about kids mastering a language that 「to master a language one must make use of it」. Although there are methods to clearly teach the rules of the grammar and practice using those learned rules, it is thought that it would not be as effective for students at such a young age. Therefore, it is important to provide students with plenty of opportunities to listen, make their own deductions, chances to make use of words, and communicate with their teacher and friends.

This is exactly as stated in the new education guidelines where teachers 「teach in a way where students can practically make use of English in a language activity and gain comprehension through experiencing it firsthand」.

Also, it is of course to be expected that teachers remember the importance of creating awareness towards communication, as well as being aware of the other person.

- ★ The teacher is the role model for trying to use English

In the lesson, for students to use as much English as they can in activities, it is preferred that teachers also actively make use of English. Also, in foreign activities, the teacher is the best role model for trying to use English. If the teacher avoids using English and keeps their distance just because they aren't good at it, students might also feel the same way. By having a teacher as a role model that can show the students 「The teacher can't pronounce as well as the digital materials, or speak English as smoothly as the ALT, but he/she doesn't run away from English and tries hard to convey his/her thoughts and ideas」, students might also be able to think 「Alright, let's try!」

- ★ Points to be careful of when the teacher uses English

Teachers should be aware of using lots of facial and vocal expressions, as well as making use of gestures when speaking English. These are all helpful in helping students understand while they are still not used to English. Also, using visuals and concrete examples while repeating is also very important.

2 How are you? How do you do ?

Lesson Objective
(2 Hours)

- Realize the importance of expressions and gestures, while getting used to expressions related to asking and answering about emotions and body conditions
- Greet each other while making use of various gestures and expressions.
- Try to greet each other while applying gestures and expressions that will convey the message to the other party.

Language Material

- How are you? I'm (happy).
- how, are, me, and, feeling (fine, happy, good, sleepy, hungry, tired, sad, great)

[Previously Covered]Greetings
•Self Introduction

Lesson Content

Getting to know the importance of gestures, and asking each other about emotions and body.

In this lesson, the aim is to help students get used to vocabulary and expressions related to emotions and body conditions, as well as the importance of gestures and the difference in meanings they bring. Many schools check students' health conditions in the morning check-ups, but very rarely do students get the chance to ask each other how they're doing in their daily lives. With that in mind, this lesson allows students to experience asking each other how they're feeling or their body conditions. Through various activities, we can look forward to seeing students enjoy communicating with one another, as well as becoming increasingly aware of and caring about their fellow classmates.

In the 1st hour, students get familiarized with vocabulary and expressions related to emotions and body conditions. On the page, students are shown a familiar setting and are able to guess the content of the conversation where the characters are on a 「field trip」. We want students to try to imagine what the conversation is about through specific conditions and expressions by the characters. Further on, during the 2nd hour, various gestures are included.

Script

Let's Watch and Think 1

先生 :Hi, Graham. How are you?
ALT:I'm great, thanks. How are you, Ms. Ogawa?
先生 :I'm fine, thank you.
Oh, it's time to go. (自分の腕時計を見て, 慌てて)
See you later, Graham.
ALT: See you! Take care! (先生が子供のほうへ行くのを見送る)

- ① A: Nice catch.
B: I'm tired. Let's stop.
A: OK. Let's have lunch.
- ② A: Oh, no. Are you OK?
B: I'm sad. A:
Here you are.
B: Thank you. I'm happy.

Let's Watch and Think 1

- ③ A: I'm hungry.
B: Hmm, yummy.
- ④ A: Wow! Nice *obento*!
B: Thank you. I'm very happy.
- ⑤ A: Are you OK?
B: I'm sleepy.

Other than getting students to be aware that gestures are one of the most important factors in communication, help them realize that those gestures carry different meanings depending on the country or locations. For the last part of this lesson, there is an activity where students ask each other their conditions. Usually, students would greet and answer each other with expressions such as 「I'm tired」 or 「I'm sad」, but let students know that here they should make use of various previously learnt expressions and freely express their feelings or conditions.

Let's Watch and Think 1

Use the stage and expressions as hints and think about what the characters might be talking about, thus getting to know about expressions about emotions and body conditions.

- ★ By using a familiar 「field trip」 setting, 3rd grade students are given a setting where they can guess the content of the conversation. Through specific conditions and expressions by the characters, have students try to imagine what the conversation is about. From that, aside from expressing emotions, it can be a good opportunity for students to realize the important role played by facial expressions and gestures.
- ★ To create a necessity for expressing emotions and body conditions in English, purposely create a situation that involves students from different countries. Help students realize that by using English, they will be able to share and get to know how the ALT is feeling and communicate with each other much easier, thus creating a chance for students to become more interested in speaking English.
- ★ As a more challenging activity, teachers can consider letting students listen to the audio and then pointing out the character that is saying the lines. Also, it might be good to let students imitate the characters and act out their current feelings or body conditions. By doing so, students will be able to understand the meaning of the expressions through firsthand experience.
- ★ After having students listen to the audio a few times and acting out the scene, the teacher can also create a gesture quiz by letting students try to figure out what emotions are the teacher acting out through seeing the various gestures.
- ★ On the page, for the field trip situation, we can see 5 groups of children. ①The two on the top left are tired after playing ball right before lunch. ④For the two in the top center of the page, one of the kid peeks at the other kid's lunch thinking how delicious it looks. The other kid feels happy when they get their lunch praised. ⑤For the two children on the most right, one of the kid immediately finishes his lunch and starts feeling sleepy, whereas the other kid notices and speaks to him in concern. ②In the lower left pair, it seems that some problem has occurred. One of the kid dropped the rice ball that he has been looking forward to eating and feels sad. The other kid who sees this offers to share her lunch with him. ③Finally, in the bottom center pair, one of the kid who finishes his lunch quickly still feels hungry and stares at his friend's lunch in admiration.

Let's Listen

Listen to the audio, and connect the dots between the characters and their respective conditions.

- Continuing off from the previous activity, first, it would be good to ask students what are the emotions or conditions shown in the illustrations. If students say it in Japanese, the teacher can translate it into English and repeat the expressions so that students can listen to it.
- In this activity, students learn the expression "How are you?" for the first time. Here, the ALT and teacher start a conversation by saying "How are you? I'm ~" and show students the usage of the emotions and conditions by asking one another, thus allowing students to have a good idea on the meanings.
- Because it is rare for one to answer "I'm tired" or "I'm sad" in a conversation, it is not included in this activity. However, it is important to let students get used to the expressions for these emotions.
- For a more challenging activity, after finishing this activity, teachers can ask a few students "How are you?" and allow students to actually understand further the meaning of the expressions.

Let's Listen

Let's Sing

1 Hello. Hello. Hello, how are you?

I'm good. I'm good. I'm good, thank you. And you?

Let's Sing

2

Let's Sing 1 : Hello Song

- Let students sing the song while enjoying thinking of original gestures. It is important to conduct the activity with different patterns such as teachers and everyone, with the person beside you, in pairs or walking around freely, to maintain students' interest.
- Once students are used to it, it can be a good idea to ask students how they feel and switch the lyric "good" with other expressions when singing.

Let's Sing 2 : Goodbye Song

- First, let students listen to the audio, ask them what expressions they were able to catch from it, and pick up the expression "goodbye" from them. And then, have students try to figure out the meaning of the expression while understanding in what situation they should use it.

Script

Let's Listen

- 1 先生 : Hi, Takeru. How are you?
たける : I'm fine.
- 2 先生 : Hello, Emily. How are you?
エミリー : I'm hungry.
- 3 先生 : Hi, Robert. How are you?
ロバート : I'm sleepy.
- 4 先生 : Hello, Sayo. How are you?
さよ : I'm happy.

Let's Sing 1 : Hello Song

Hello. Hello. Hello, how are you?
I'm good. I'm good. I'm good, thank you. And you?

Let's Sing 2 : Goodbye Song

Goodbye to you. Goodbye to you.
Goodbye, dear friends. I'll see you again.

Let's Watch and Think

Activity

Let's Watch and Think 2

- 1 Good! 2 I don't know. 3 Me? 4 Good idea!
5 Come here. 6 Give me five.

先生 : Robert, where is Takeru?
ロバート : I don't know. Please ask Sayo.
先生 : Good idea! Sayo, come here.
さよ : Me?
先生 : Yes. Please come here. Where is Takeru?
さよ : He is helping Mr. Brown.
先生 : Great, Takeru! Nice work. Give me five.

指導者の表現例

Look at the TV. (テレビを見ましょう。)
Listen carefully. (しっかり聞きましょう。)
Let's sing a song. (歌を歌いましょう。)
Let's interview our friends.
(友達にインタビューをしましょう。)
Go back to your seats. (席に戻りましょう。)
Let's sing together. (一緒に歌いましょう。)
Draw lines. (線を引きましょう。)

Let's Watch and Think 2

Get to know what each gestures means.

- The teacher shows students the actual gestures.
- The Japanese gesture of waving the hands downwards to ask someone to "come here" is often seen by foreigners to have a different meaning of chasing someone away. Have students experience firsthand and understand that there are many differences between Japanese and foreign culture and customs, as well as there being various ways of thinking.
- Aside from eye contact, the loudness of the voice, and intonation, help students understand that by using facial expressions and gestures, it will make it a lot easier to get their feelings or message across to the other party.
- Doing a more challenging activity such as having students and teacher do various gestures and have everyone try to guess which expression or body condition it is referring to through a gesture quiz can also be a good idea. By doing so, students will be able to further understand firsthand the meanings of the expressions and gestures.

Activity

Have students ask each other's conditions and answer while also using gestures.

- Show an example before starting the activity, and help students be more aware of how to make use of facial expressions and gestures to convey their message and feelings to the other party.
- In their daily lives, students rarely have the chance to ask one other how they're doing or check their conditions. Through this activity, help students enjoy communicating with one another, as well as become increasingly aware of and caring towards their fellow classmates.

活動を始める際などに使う表現例を紹介しています。

- Lesson Objective (4 Hours)
- Realize there are different ways of thinking and counting in Japan and foreign countries, as well as get used to how to say the numbers 1to 20 and asking questions about numbers.
 - Ask and answer each other about numbers.
 - Figure out how to express to the other party while asking and answer each other about numbers.

Language material

OHow many (apples)? (Ten)
(apples). Yes. That's right. No.
Sorry.

many, Numbers (1~20), Belongings (counter, ball, pencil, eraser, ruler, crayon), Fruits・Vegetables (apple, strawberry, tomato), Shapes (circle, triangle, cross, heart), stroke, yes, no, sorry, that, is, right

[Previously Covered]Greetings・Self-Intro, Conditions・Feelings

Lesson Content

Getting used to and asking each other about numbers up to 20.

Unlike in unit 1 and 2, the current unit uses 4 hours. The unit is made in a step by step method to not place too much of a burden on the students, while slowly progressing towards the 「Introduce your favorite kanji」 activity at the end of the unit. Students will first get to know the various ways of playing 「Janken」 and 「How to count numbers」 in foreign countries, and realize the similarities and differences with Japan. And through various activities, get to know not only the numbers 1~20, but also vocabulary of things that the students are familiar with in their daily lives such as stationaries, fruits, shapes, and so on. They will move towards the final activity while getting used to the expressions for asking and answering about numbers.

Upon entering this lesson, there might be some students who will proudly start saying the numbers thinking 「I already know it」. While it is important to acknowledge that ambition, let students know that just being able to count to 20 isn't the final aim of this lesson. By personally experiencing various activities

Script

Let's Sing: Ten Steps

One, two, three, four, five, six, seven.
One, two, three, four, five, six, seven.
Eight, nine, ten, eight, nine, ten.
One, two, three, four, five, six, seven.

Eleven, twelve, thirteen, fourteen, fifteen, sixteen, seventeen.
Eleven, twelve, thirteen, fourteen, fifteen, sixteen, seventeen.
Eighteen, nineteen, twenty, eighteen, nineteen, twenty.
Eleven, twelve, thirteen, fourteen, fifteen, sixteen, seventeen.

such as counting the number of times they win in “Rock, Scissors, Paper”, counting the number of objects around them, or listening to the numbers said by teachers and showing it with their fingers, students will not only be able to think for themselves, but also learn the importance of connecting between the audio and the actual objects. In addition, through activities such as counting the number of apples or the strokes of their favorite kanji and asking each other about it, this unit also focuses on getting students familiarized with words and expressions to be used in communication or during conversations. Even in the 「Tell each other about your favorite kanji」 activity, it isn't only about asking each other the number of strokes, but also being able to say in Japanese the reason for liking that particular kanji. Although they are 3rd graders with limited English vocabulary, these kind of methods help give the activity a deeper purpose.

- ★ On the first page, we can see various objects from our daily lives. While asking students about the objects with questions such as “Look at this picture”, or about numbers with questions like “How many balls? One? Two?”, students will have a rough idea of the unit.
- ★ When clicking on the digital resources, the object becomes enlarged, the audio of the object plays, and the numbers become countable. Although it is made for the 2nd hour lesson, teachers should make use of it according to the condition of the students.

Let's Sing: Ten Steps

- ★ Have students get used to how to say 1~20 while singing. The lyrics for 「1~10」 and 「11~20」 are separated, so teachers should make use of the different stages accordingly.
- ★ When considering the development of 3rd graders, teachers should let students move their bodies, while experiencing the English rhythm and audio first hand to get used to the expressions. For example, teachers can work to raise the desire or ambition of students by setting levels for the numbers, and in that level perhaps avoid singing and only clap when reaching a certain number, or other challenges such as changing the singing speed or adding gestures and steps when singing.

Let's Play 1

Place the marbles on randomly decided numbers around the page, and once the said numbers is read aloud in the audio, students must then take the marble. For this activity, the aim is to have students get familiarized by letting them listen to the audio repeatedly.

- ★ Although students are able to say the numbers in order, at this point for 3rd graders, listening and differentiating between numbers when said randomly can still be quite difficult. Teachers need to handle the students' condition with care while observing them. Also, as the year goes on, it becomes important to continue using the numbers in a spiral.

It is important to let students have a sense of accomplishment. According to the conditions of the students, it might be good to separate 1~10 and 11~20 of the activity into two parts. Another way would be to conduct the activity in pairs, and have each of them place 5 marbles while increasing the activity challenge, and building up a sense of cooperation and trust through the activity.

- ★ It is important that the teacher speak slowly and periodically, and have students remember through both audio and visual by also showing picture cards for the numbers, so as to reduce the feelings of uneasiness that students may have.

Let's Play 2

Play "Rock, Paper, Scissors" and write down their score on the table with ○ (Win)
△ (Draw) × (Lose).

- ★ This activity is planned to be separately done twice, both in the 1st and 3rd hour. The aim of this activity is to get to know how to say the numbers 1~20.

- ★ In the 1st hour, the teacher teaches the students how to say "Rock, Scissors, Paper" in English, and have them play for 10 times and write down their score on the page.

- ★ The teacher asks students the number of times they win with "How many (circles)?", and then have students raise their hands while saying the numbers 1~10 in order. Also ask about the number of triangles △ and cross × while not being too focused on winning or losing.

- ★ For the 2nd round, it is planned to be played in the 3rd hour. Conduct the activity after getting students fairly familiarized with the numbers 11~20 in the 2nd hour. Then have students count their total number of shapes including the scores from the first round.

Let's Watch and Think

Watch the digital material, and write in the □ each country's respective way of counting.

- ★ In the digital material, each child from different countries will say the numbers until 10 in their respective languages and in English.
- ★ Ask the students about what they noticed about the way the numbers are counted. Pause the video in the middle, and have students notice how similar the Chinese and Korean way of saying 「3」 is similar with the Japanese way.
- ★ When letting students listen to the Japanese, stop right before 「4」, 「7」 and 「9」, and have students think about how to say it. Have them realize that even in Japanese there are various ways to count such as how 「4」 is read as 「shi」 or 「yon」, 「7」 as 「shichi」 or 「nana」, and 「9」 as 「ku」 or 「kyuu」.

Let's Chant : How many?

- ★ There are 3 versions and the numbers used are increased according to different levels.
- ★ Once students are used to it, have students say 1~20 while replacing with various other objects such as crayons.

Activity

●あなたの好きな漢字を書こう

●友だちの好きな漢字を書こう

One, two, three, four, five strokes.
 Oh, "本." I see.

Pencils, pencils, how many pencils?
 One, two, three, four, five pencils.
 Six, seven, eight, nine pencils!
 Wow! So many.

Let's Play 3

Ask and answer questions about numbers about the objects that appear on screen within the digital resource.

- ★ Have students look at the screen for about one minute and then hide it and ask students questions like "How many apples?". By making students guess with only their memory of what they saw, students will become interested in actually counting the exact number of the objects. This activity is connected to the next Activity 1.

Activity 1

Color the number of apples that they like, and have students ask each other the numbers of apples.

- ★ If the ALT is present, it might be easier for students to understand how to do the activity through a demonstration. In the case that the teacher is alone, it might also be good to ask for a volunteer from one of the students.

- ★ For this activity, the aim is to have students communicate and ask each other the number of apples and find friends who have the same number of apples. When students find friends who have the same amount of apples and feel happy about it, that will lead to them feeling enjoyment. To make it easier for students to find friends with the same number as them, teachers can split the activity into two times.

- ★ Although strictly speaking, the right way would be to ask saying "How many apples do you have in your basket?" and answer with "I have ~ apples", when considering the burden upon the students it would be wiser to just leave it at asking with "How many apples? And answering with "~ apples". It is important to make this an activity where students are confident enough to communicate with one another.

- ★ At the end of the activity, the teacher can ask students "How many friends did you find?" to have students count the number of friends they found. Another way would be to have the teacher fix a number of apples and have the students with said number of apples to raise their hands, and have everyone count the number of students on their own.

Activity 2

Count the number of strokes, and introduce your favorite kanji.

- ★ This activity has students picking their favorite kanji that have between 1~13 strokes, and presenting about it. To find out what kanji their friends have chosen, students will naturally have to ask about the number of strokes, get hints about the kanji and guess what is it, while enjoying the communication that has an information gap.
- ★ When introducing about their favorite kanji and the reasons for it, it can be expected that it will not only help students learn about Japanese studies, but also deepen the understanding between their fellow classmates.

4 I like blue.

Say what you like

- Lesson Objective**
(4 Hours)
- Realize there are different ways of thinking and realize through words with foreign origin that the sound and rhythm between English and Japanese are different. Also, learn about how to say colors, and get used to expressing as well as asking and answering about things that you like.
 - Ask and answer each other about things you like.
 - Figure out how to express to the other party while asking and answer each other about things you like.

Language Material

○ I like(blue). Do you like(blue)?
Yes, I do. / No, I don't. I don't like
(blue).

○ like, do, not, don't, too, Colors (red, blue, green, yellow, pink, black, white, orange, purple, brown), Sports (soccer, baseball, basketball, dodgeball, swimming), Food (ice cream, pudding, milk, orange juice), Fruits・Vegetables (onion, green pepper, cucumber, carrot), rainbow

[Previously Covered] Greetings・Self-Introductions, Conditions・Feelings

Lesson Content

Expressing to one another about things you like.

When considering the development of 3rd graders, although they might have a selfish part to them, it is also a time for gradual deepening of friendships. With that in mind, the topic of “expressing to one another about things you like” becomes the focus of this unit. In our daily lives, things like television programs and food, along with many others provides a situation for us to express our likes and dislikes, which can make this a relatable topic for students. By expressing their likes and introducing themselves to each other, it can be expected to deepen their understanding towards each other.

The aim for this unit is to have students “try to figure out and express their likes and introduce themselves to one another”. As the first step to achieving that aim, students are asked to do a “draw a

Script

Let's Chant : I like blue.

“I like blue.”
Blue, blue, I like blue.
Pink, pink, I like pink.
Red, red, I like red.
Wow! Beautiful!

“I like soccer.”(スポーツ編)
I like soccer. I like dodgeball.
Ummm, I don't like baseball.
I like tennis. I like basketball.
Ummm, I don't like swimming.

“Do you like soccer?”(スポーツ・QA編)
Do you like soccer? Yes, I do.
Do you like baseball? Yes, I do.
Do you like swimming? No, I don't. I don't like swimming.

Let's Sing : The Rainbow Song

Red and yellow and pink and green,
purple and orange and blue,
I can sing a rainbow, sing a rainbow, sing a rainbow, too.

rainbow” activity in the 1st hour that will help them realize that there are different ways of seeing things, and start their encounter with color-related expressions. In the 2nd hour, students are then accustomed to the expressions that help them express their likings. In the 3rd hour, students do an activity where they express to one another about things they like, and finally finish the lesson by doing a self-introduction. Various activities are carried out step by step in this unit, but with the teacher understanding the aim of this unit, it is hoped that they will become activities that creates situations where students voluntarily and actively want to listen and speak.

Activity 1

Color and complete you own rainbow as you like.

- ★ By doing the “What's this?” quiz (hide pictures of rainbows in an envelope and give hints) or ask questions like “What's

this?” while pointing at the page, pick up student's whispers and introduce the English word “rainbow” to them.

- ★ While asking about the colors they chose and the order they put them, have students realize that each of them can have different ways of seeing things.

Let's Watch and Think 1

Watch the digital resource, and notice the differences of the rainbows drawn by children from around the world.

- ★ By watching children of the same age from foreign countries draw their rainbows, have students compare the differences and similarities with their own drawings. It is a good opportunity for students to experience firsthand and realize that even the same rainbow can be seen in various ways and it is important to acknowledge each other's differences. Also, make sure to consider and stress to students that these are only personal differences and be careful to avoid misunderstandings such as 「In ○○ country, they draw their rainbows with ○ color」.
- ★ Through their experiences with the various greetings, gestures and ways to express numbers around the world, students' understanding towards diversity will further deepen. Through this unit's activities, students will gain a stronger interest in other countries and areas of the world.

Let's Chant : I like blue.

- ★ Once familiarized with the chant, let students replace colors or sports with things of their own choice, and further increase their desire to learn.

Let's Sing : The Rainbow Song

- ★ While it is meant for use from the 2nd hour, depending on the condition of the students it is also possible to already include it in the 1st hour lesson.
- ★ First, have students only listen to the audio, and then ask them about “what colors did you hear?” to help them participate more actively in the activity.
- ★ The aim is to have students get familiar with the sounds. It is enough for them to be able to sing only parts that they like or that they can sing. Playing the song while students are drawing their rainbows can also be a good idea.

Let's Listen 1

Listen to the audio, and connect the dots between each of the characters and the color they like.

- ★ To get students to actively listen, it is necessary to provide some motivation. By asking questions such as "I like red. Do you like red? Yes? No?" and getting students to guess the characters' favorite colors, their desire to listen should increase.

- ★ Be careful not to put too much stress on students by requiring them to understand everything. The main point here is to get them to enjoy the feeling of 「I listened and understood English」 even just once.

Let's Listen 2

Listen to the audio, and write the number for the sports the characters like or dislike in the given table.

- ★ Ask students about the sports on the page with questions such as "I like soccer. Do you like soccer? Yes? No?" to find out what they like, then have them guess what sports the characters might like, to increase the students' desire to listen during the activity.

For sports names, students should already know quite a lot through words with foreign origins. The aim of this activity is to have students notice the differences in sound between English and the foreign origin words they are already familiar with.

Let's Listen 3

Listen to the conversation, and ○ the things that the character likes.

- ★ Before beginning the activity, use picture cards and ask students questions like "Do you like~?" and push them to answer with "Yes? No?" so they can further understand the meaning of the expression "Do you like~?". Teachers can also answer "Me, too" in the appropriate situations.

- ★ By having students try to guess what the characters' like, it will create a motive to "want to listen" and bring about a "necessity to listen". Teachers should create situations that will motivate students to listen according to their conditions.

Unit 3

Let's Listen 1

Let's Listen 2

Let's Listen 3

16

Script

Let's Listen 1

- 1 Hello! I'm Takeru. I like yellow.
- 2 Hi! I'm Sayo. I like blue.
- 3 Hello! My name is Robert. I like red.

Let's Listen 2

- ① Hi, I'm Takeru. I like soccer. I don't like baseball.
- ② Hello. My name is Sayo. I like basketball. I don't like swimming.
- ③ Hello! I'm Emily. I like swimming. I don't like dodgeball.

Let's Listen 3

- ①エミリー : Do you like pudding / milk / yellow

Unit 4

Let's Watch and Think

Let's Play

Activity

17

Let's Watch and Think

Guess if the characters like or dislike the things, write the answer as ○ or △ and have students check their answers by asking the characters "Do you like~?".

To help the students get familiarized with the expression "Do you like~?", teachers ask students about things on the page such as colors with questions like "I like blue. Do you like blue? Yes? No?" and increase their interest in this activity while making use of the digital resources. By asking the characters about things they like and having that aim of wanting to know the answer, the necessity to listen to the answer is born.

Let's Play

Look at the things in the table, guess their friends' likes and dislikes, interview to confirm the answer, and write down the results in the □.

- ★ By guessing whether their friends like or dislike the things based on their usual behavior, the main point of this activity is to increase the feeling of wanting to ask. After the activity is over, ask the students about the unexpected things they learned from interviewing their friends to further deepen their understanding of each other.

Activity 2

Express about the things they like and introduce themselves.

- ★ By having the teacher as the model example, help students understand how to introduce themselves. The teacher can slowly introduce his or herself while pointing one by one at the pictures or illustrations that are drawn on the worksheet.

- ★ After the activity, have students present about the unexpected things they learned about their friends through this self-introduction activity. Have students realize that even though they see each other often there are still many things they do not know about each other, and increase the desire to get to know each other even better.

Unit 5 What do you like?

- Lesson Objective (4 Hours)
- To notice the difference between English and Japanese sounds, and get used to the words for things around them and expressions for asking and answering about things they like.
 - Be able to converse about things they like.
 - While thinking of how to get a message across to their partner being able to converse about things they like.

Language Material

○What do you like? I like (tennis).
What (sport) do you like? I like (soccer).

○What, color, Sports (sport, volleyball, table tennis), Food and drink (food, hamburger, pizza, spaghetti, steak, salad, cake, noodle, egg, rice ball, jam), Fruit • Vegetables (fruit, grapes, pineapple, peach, melon, banana, kiwi fruit, lemon)

[Previously Learned] Greetings, Do you like (blue)? Yes, I do. / No, I don't. numbers (1 ~ 20), Color, Fruits • Vegetables, Food, Sports

Unit Content

Talk about things they like.

As a continuation from Unit 4, this will discuss things one likes. However, in this unit they won't be asking if their partner likes a specific thing but rather, they will ask what they like in a topic. While using the expression "what ~ do you like?" With several topics including sports, food and fruits and vegetables, they will feel excited to talk in English in this unit. Because we expect there to be a big difference in ability from child to child, the activities should be held carefully. We want to make sure we talk small steps to the final interview activity so the students will have confidence when doing it.

Script

Let's Chant: What do you like?

(色編)
What color do you like? What color do you like?
I like red. I like blue. I like red and blue.
What color do you like? What color do you like?
I like green. I like yellow. I like green and yellow.
Wow! Nice T-shirt!

(果物編)
What fruit do you like? What fruit do you like? I like apples. I like grapes. I like apples and grapes.
What fruit do you like? What fruit do you like? I like oranges. I like peaches. I like oranges and peaches.
Wow! Nice parfait!

(食べ物編)

What food do you like? What food do you like?
I like *sushi*. I like ice cream. I like *sushi* and ice cream.
What food do you like? What food do you like?
I like pizza. I like hamburgers. I like pizza and hamburgers.
Wow! Nice party!

While continuing learning new numbers and months in this school year, this is also a time in which the relationships with their classmates are deepening. Following that this unit was designed to help them develop stronger relationships with their classmates.

Let's Play

On the page there are many cards with pictures, while saying the names of the pictures, touch the cards.

- ★ On the page there are pictures of food, drink and sports. Most of these they have heard out in their daily lives. Because of this we want them to notice the difference in sounds between the English and Japanese as well as other interesting things. Instead of the teacher to explain the words, we want the students to get used to them by repeating and listening, this will give them a more hands on experience.
- ★ The goal of this is for the students to get used to the words by listening to them several times. Once gotten used to you can do the activity in pairs, fast, or have a student play as the teacher. Think of several ways so the children do not get bored.
- ★ This can be done also by rather than taking the cards just pointing to the cards.

Let's Chant: What do you like?

- ★ There are 3 versions to this; colors, fruits, and foods. The goal of this is for the students to have a good activity according to their level.
- ★ Once gotten used to, let the students take control and choose the words they want and change the chant.

指導者の表現例

Look at the book. (テキストを見なさい。)
That's right. (その通りです。)
Very good. (とてもいいです。)
Let's play the Pointing Game.
(ポインティング・ゲームをしましょう。)
Make a pair / pairs. (ペアになりなさい。)
Go back to your seats.
(席に戻りなさい。)

ポインティング・ゲームをする際に主に使う表現例を紹介しています。

Let's Listen

Listen to the audio, draw a line between the characters and what they like.

- ★ Here we will use the words for sports and food that the students have gotten used to in the expression "What ~ do you like?" The goal here is for the student to listen several times and understand the meaning. Make sure they notice there is no s at the end of sport or food.

- ★ Depending on the level of the class you can stop the audio and connect the lines one by one, or you can listen to the whole thing and let them connect the lines on their own.

Activity 1

In pairs guess what your partner likes and ask them, fill in the chart.

- ★ By asking about what you predicted, it gives the students to ask to confirm if they were correct or not.
- ★ They can ask about something they already know about their friend or something they don't know so that both of their understanding deepens.
- ★ The categories are fruit, colors and sports, but the students can change them to what they like.

Let's Watch and Think

Watch the digital textbook, predict what the characters like. In order to check the answers, ask the characters "What ~ do you like?".

- ★ Here there are many new words about food and sports. First you should ask the students what kind of things are there, we want them to get used to the words by listening and repeating them.
- ★ The goal here is for the students to get used to the expression "What ~ do you like?" In the video the scene is the characters having a conversation. One person says "Do you like ~" and the partner

Let's Listen

Activity 1

あなた	よそう 回答	よそう 回答	よそう 回答

Script

Let's Listen

- 先生 : Hello, Sayo. What sport do you like?
 さよ : I like basketball.
 先生 : What food do you like?
 さよ : I like oranges.
- 先生 : Hi, Takeru. What sport do you like?
 たける : I like dodgeball.
 先生 : What food do you like?
 たける : I like strawberries.
- 先生 : Hello, Robert. What sport do you like?
 ロバート : I like soccer.
 先生 : What food do you like?
 ロバート : I like tomatoes.

Unit 5

Let's Watch and Think

Activity 2

名前	fruit	color	sport
あなた			

Activity 1

- 例1
- あやめ : Hi. Ren. What fruit do you like?
 れん : I like strawberries.
 あやめ : What color do you like?
 れん : I like yellow and green.
 あやめ : What sport do you like?
 れん : I like swimming.
 あやめ : Swimming? Me, too. Thank you.
- 例2
- れん : Hello, Ayame. What fruit do you like?
 あやめ : I like bananas.
 れん : Oh, nice. What color do you like?
 あやめ : I like blue.
 れん : I see. What sport do you like?
 あやめ : I like volleyball and swimming.
 れん : Thank you.

says "No I don't" to everything. Please stop the video part way through and have the students guess what they like. Following that have the students ask "What ~ do you like?" And the character will answer with "I like ~." This will connect with the students feeling of wanting to check their answers.

- ★ Here the students are communicating with the character on the screen, this activity will be useful in the "stereo game" or the next hours "Activity 1."

Activity 2

Students will ask each other about what things they like (food, colors) and fill in the chart.

- ★ Using the now familiar expressions "What ~ do you like?" And "I like ~" this activity will involve the students asking each other what they like.
- ★ In accordance to the students level, other than food and colors, the students can choose another category (fruits and sports etc.) to ask about and they will write it in the space.
- ★ In order for everyone to understand this activity, please demonstrate with two teachers, a teacher and a student, or two students.
- ★ The students while planning how to communicate with their partner should ask and answer about what they like, by this their understanding for each other will deepen as well as showing them everyone likes something different. This will let them experience the excitement of having a conversations.
- ★ You can evaluate them during this activity, whether the students are actively interviewing, using gestures, and greeting. Find a student and use them as a good example. This will show the kids an actual example of how to communicate with their partner.

Lesson Objective (4 Hours)

- For the students to notice the letters all around them, and get used to how to read them.
- To be able to tell someone the first letter of their name.
- While planning on how to communicate with their partner and be able to tell the first letter of their name.

Language Material

- (The “A” card), please. Here you are. Thank you. You’re welcome.
- Capitals(A~Z), the, card, alphabet, please, here, thank, welcome, Numbers (21~30,O), book, drum, fish, gorilla, hat, ink, jet, king, monkey, notebook, pig, queen, rabbit, sun, tree, umbrella, violin, watch, box, yacht

[Previously Covered] Greetings, you, are, Numbers(1~20), apple, crayon, egg, lemon, orange

Unit Content

Getting used to capital letters.

This will be the first time to deal with the alphabet in a unit, the goal is for the students to get used the names of the capital letters. The students have encountered Roman letters in their Japanese class, and in social studies class. We should connect this to their studies in other classes, furthermore, we want to make sure the students are interested by planning with the digital resource. Through the activity to search for letters, the students will once again realize they are surrounded by these letters. Them noticing this will make them more interested in the subject.

In the first hour, the students will encounter the letters for the first time and learn the way to read each one. After that, while practicing the

Script

Textbook

ABCDEFGHIJKLMNOPQRSTUVWXYZ
apple, book, crayon, drum, egg, fish, gorilla, hat, ink, jet, king, lemon, monkey, notebook, orange, pig, queen, rabbit, sun, tree, umbrella, violin, watch, box, yacht, zero

Let's Watch and Think

Let's take a trip around the town. Can you see any letters of the alphabet? What can we find?

Let's Sing: ABC Song

A, B, C, D, E, F, G, H, I, J, K, L, M, N, O, P, Q, R, S, T, U, V, W, X, Y, Z.
Happy, happy, I'm happy. I can sing my ABC.

letters with the pointing game and bingo game, the 3rd hour they will look at the shape of all the letters. Furthermore, they will do. An activity to gather their initials from all the letters in the 4th hour.

In this unit, they will start studying the letters they will use in future years, so it is very important. Because of this, we want to be careful of the difference of level in each student and let them have fun so they will become more interested. In order to do this the teacher should try to refrain from just teaching it as random knowledge, we just want them to be able to match the letters and the sounds.

Let's Watch and Think

Watch the digital resource, thing about what letters all the signs represent and learn about capital letters.

★ In this activity, the students will learn the capital letter B and get used to the name (/bi:/). While doing this, we want the students to realize that these letters are all around

them. Through this activity we want the students to feel not only about people and things, but also culture that crosses national borders with these letters.

- ★ By making the students find the letters around the town in the video, we want them to feel like they can find all these letters around the area that they live.
- ★ After Let's Watch and Think, introduce the names of the letters A~Z, and do the activity to find the letters on the page. The layout of the page is so the students can have fun with capital letters. In the digital resource, when found you can click the letters and it will say the letters name.
- ★ With the exception of X, things that begin with each letter are hidden around the page. But, it is not the goal of this activity for the students to make a connection with the letter and the sound it makes in the word. In the next few years the students will learn the letters and their sounds, but for now it is fine to just let them know the letter A is in apple. What is important is that the students realize this, there is no need for explanation.

★ We want to discuss that there are many ways to say the same thing in English for example the letter Z in American English is pronounced /zi:/, but in British English it's /zed/.

★ As an expansion activity, it is fun to have the students look for these letters around the school and on their way home and present what they found. Through their own experience, it is good for the kids to realize again that they are surrounded by these letters.

★ When doing the pointing game, it is okay to use the Letters around the page too. In that case, they can do it alone or in pairs (cooperatively, against each other, etc.) it is important to plan accordingly to the level of the class in order to maximize motivation.

(Let's Singの解説は27ページに掲載)

Let's Play

Separate the letters into categories and paste them on the card.

- ★ In order to deepen the understanding of the shape of the letters, we want the students to play with the capital letters. In the example, these letters are grouped together because they are made up with straight lines. You can also do, curved lines, letters that look similar, letters made with curved and straight lines, letters that are symmetric, and even letters that the student likes. By doing this the students will learn a lot about the shape of the letters and get used to the names as well. But remember that the goal of this is just for them to get used to the letters.
- ★ By introducing these letters to each other they will learn about the similarity and differences in the letters.

Activity

Get the initial letter cards from your friend family and yourself and paste it.

- ★ The students will learn the initials of their or a friends names. By then collecting these letters their understanding of them will increase. We want them to have fun, while they get used to these letters.
- ★ The teacher should create several copies of the alphabet cards (copy and cut the cards in the back of the textbook). Put the students in to roles of giving the cards and receiving the cards, use the name card they received in unit 1 as a reference and go take the letters for their initials.
- ★ The easy expressions we're using here is, "Hi. The 'A' card, please. Here you are. Thank you. You're welcome." Before doing the activity, the teacher should do a demonstration and use the expressions they will use over and over. But, according to the goal in the new explanation of foreign language study "they should support" the students should support

主にActivityで使う表現例を紹介しています。

and help one another, and the teacher should help an appropriate amount.

- ★ When doing this activity, depending on the size and level of the class, there are many ways to do this activity. For example, what kind of letters will be given to each student that gives them out, putting them in a way to find all the letters. Imagining what the students will actually do and preparing for that is important. By doing this the teacher can add extra phrases to make it slightly harder.
- ★ The cards the students receive will be pasted on to the page. Finally, they will present by saying "Hello everyone. I'm Tanaka. "T" and "H." Thank you.
- ★ If using the initials of friends or families, they will need to figure it out before they begin.

Let's Sing : ABC Song (From p.25)

- ★ By moving their bodies, hands or just pointing at the page, it is important to plan so they can have fun while singing.
- ★ There are many songs that are available with the alphabet in them, we should do an activity that the students are interested in.

Let's Chart : What do you want? (From p.29)

- ★ The goal here is for the students to get used to the expression that they will use in the final activity. On the screen there are many different shapes the become a family, cars or candy. By having them say this the students will get motivation by thinking about what they want to make.
- ★ One they get used to this, using the shapes they want, they should make their own chant

7 This is for you.

カードをおくろう

Lesson Objective
(5 Hours)

- To hear the difference in Japanese and English sounds, ways to say shapes and get used to conversations about things they want.
- To be able to ask and answer about things they want.
- While trying to communicate to their partner, be able to introduce your item.

Language Material

○What do you want? (A star), please. Here you are. This is for you. Thank you. You're welcome.

○want, this, a, for, Feelings • Conditions (big, small), Shape (square, rectangle, star, diamond), bus, flower, shop, balloon, house, car, candy, Animals (dog, cat, panda, mouse, bear)

[Previous Covered] I like (blue). Do you like (blue)? Yes, I do. / No, I don't. I don't like (blue). What (sport) do you like? How many (apples)? Shapes, Colors, Numbers (1 ~30), tree

Unit Content

Send a card that was made from shapes they gathered.

Up until this unit, the students have learned numbers, fruits and vegetables, the way to express things around them, as well as getting used to expressions to greet people and express things they like. In this unit, first they will encounter the way to say many different shapes and how to say what they want. Following this, using these words and expressions they will make a card and introduce it. Here we want the students to especially understand the goal and their partner.

In the first hour aimed towards the final activity, the students will notice the different between Japanese and English sounds as well as learn the names of shapes, and using the digital resource they will learn about cards all over the world. In the second and 3rd hour, the students will get used to expressions and words for shapes asking

Script

Let's Chant: What do you want?

What do you want? A red triangle, please.
What do you want? A pink square, please.
Wow! A house.

What do you want? A blue rectangle, please.
What do you want? A black circle, please.
What do you want? A black circle, please.
Wow! A car.

What do you want? A yellow circle, please.
What do you want? A green triangle, please.
What do you want? A green triangle, please.
Wow! A candy.

and answering about things they want. In the 4th hour, they will make a card with the shapes that they like, and in the 5th hour they will present those cards. Also, in this unit, there are many activities that will allow the students to get used to these expressions. These activities are used to achieve the goal by have the students say and hear the expressions several times in order for their interest and confidence to grow.

Let's Play 1

Use the digital resource, look at the silhouettes and guess what they are. Open the windows that have many shapes and guess what's behind.

- ★ in the digital resource there are 2 kinds of quizzes. The first one is the shape quiz. By looking at the black silhouette (circle, triangle, square etc.) they will guess what it is. The teacher should first ask "What shape is this?" Not saying In Japanese "shape is 'katachi'" but by pointing at the shape and using gestures so the students will understand, they will probably say the shape name in Japanese. The teacher should accept that and say "That's right! This is a triangle" so they can experience the language used. After that, look at the silhouettes and predict what it is, we want the

students to do the quiz with interest. It's important to listen and acknowledge all the students guess'.

- ★ Second, there are many animals hidden behind different shapes windows and the students must guess what they are. Have the students say what window they want to open, then the teacher will click on it and the animal will start to appear. At this point we assume the student still can't say the shapes in English. When the students say in Japanese, the teacher should say in English "Oh a heart?" or what ever shape it is. We can expect by doing this several times that the students will start to connect the shapes with the names.
- ★ Also in the second activity, animals are are very close to the children are being used so the students should have interest in the activity. When doing this, use previously learned expressions such as, "I like dogs. Do you like dogs?"

Let's Play 2

Listen to the audio, point to the shapes.

- ★ First, ask with the students what kind of shapes and how many are hidden.
- ★ They will listen to the audio or teachers voice, look for the shape and point to it. The goal is for the students to get used to this by listening to it several times.
- ★ By changing the style and making them do it alone or in pairs, their interest will continue to grow. Also, in the pair activity, there are several different ways (contest, cooperate etc.) for the students to enjoy while learning these words.
- ★ Once gotten used to, you can let a student play the role of the teacher.

(Let's Chant is on pg. 27)

Let's Watch and Think

Watch the digital resource and learn about different greeting cards from all over the world.

- ★ From watching the video, we want the students to notice many different countries' culture and customs. In stead of just introducing that card, we want the students to see the context in which it is used. Even if the appearance and way of giving is different the students should notice that you must think of your partner, and it's a way to tell them what you want to say. The teacher should show them the video with the intent of achieving that goal.

Let's Listen

Listen to the audio about shapes they want, draw a line from who to what they made.

- ★ In the conversation, they use the expression "What do you want? ~, please. How many. Etc." which is used in the final activity. So we are expecting the students to hear this many times and get used to the expressions.

- ★ Before listening to the audio, let the students think about what shapes and how many are in each picture. Please listen and praise objectively.

- ★ There are many ways of doing this, such as stopping the audio in between and letting them connect the lines, or listening to the entire audio and afterward have them draw lines. Please watch the class and adjust it for their level.

Activity

Collect several different colored shapes and make a greeting card they will present.

- ★ First, the teacher should model the activity. We want to encourage the students by having them make a card for their ALT teacher or another teacher in school.
- ★ First let them think about what they want to say and to whom. If you limit it to just their friends please be careful that a child doesn't get left out or feel lonely.

Script

Let's Watch and Think

- ① This is for you. Merry Christmas!
- ② This is for you. Happy Birthday.
- ③ This is for you. Happy Valentine's Day.
- ④ Thank you, Graham *sensei*. This is for you.
Ah, so nice. My treasure.
- ⑤ What's this?
It's a *nengajo*, Japanese New Year's Card, from Ren in Kyoto. Look, this is Ren.

Let's Listen

- 1 先生 : What do you want, Sayo?
さよ : Black stars, please.
先生 : How many?
さよ : Two, please.
先生 : OK! What do you want?
さよ : A big red circle, please.
先生 : OK! What do you want?
さよ : A blue rectangle, please.

- 先生 : Here you are.
さよ : Thank you.
- 2 先生 : What do you want, Takeru?
たける : Small pink hearts, please.
先生 : How many?
たける : Eight, please.
先生 : OK! What do you want?
たける : Green triangles, please.
先生 : How many?
たける : Four, please.
先生 : OK! What do you want?
たける : Two brown rectangles, please.
先生 : Here you are.
たける : Thank you.
 - 3 先生 : What do you want, Emily?
エミリー : A big yellow star, please.
先生 : OK! What do you want?
エミリー : Nine green triangles, please.
先生 : OK! What do you want?
エミリー : A brown square, please.
先生 : Here you are.
エミリー : Thank you.

- ★ The teacher should in advance prepare enough materials for the class. By preparing the same shape in many different colors, the students imagination will spread and their interest will grow.

- ★ In the activity the students will be acting as a store clerk. It should be separated into clerks and customers, and have them change half way through. Furthermore, you should plan the activity based on the level of the class. When doing the activity, even if not the units expressions, the teacher should support the students in English to create a reason to use English and please praise a lot.

- ★ Instead of just doing a worksheet, the teacher should use an original paper in order for the students to be more interested. Also, you can have them write a message to the person they are sending the card to. Because up until this point the students have gotten used to capital letters they can spell out "THANK YOU" in capital letter cards on their card. Letting the students write in Japanese is also okay, this way it has more of a message feel to it.

- ★ When giving the card the students should say things like "This is for you. Thank you. Etc." in order to do this please show the students an example, you can do it before beginning the activity.

- ★ Before giving the card, you can display them in the classroom or showing the class the cards.

指導者の表現例

How many triangles do you want?
(三角形をいくつ欲しいですか。)
Can you find a triangle?
(三角形を見つけられるかな。)

8 What's this?

Lesson Objective
(5 Hours)

- For the students to notice the difference between English words used in Japanese and the actual English words, understand how to say the things around them, and be able to ask and answer about what something is.
- Be able to give and answer quizzes.
- While planning communication to a partner, be able to ask and answer quizzes.

Language Material

○ What's this? Hint, please. It's (a fruit). It's (green). It's (a melon). That's right.

○ It, hint, sea, Animals (elephant, horse), spider

[Previously Learned] I like (blue). Do you like (blue)? Yes, I do. / No, I don't. No. Sorry. Numbers (1~30), Fruits, Vegetables, Food, Animals, Colors, Shapes, Feelings, Conditions, what, is, this, please

Unit Content

Quiz Tournament.

The students who just started English in April also have gotten used to the activities, this is the time that they will be able to participate in activities best. Also, seeing as it's the end of the year, they have gotten very close to their fellow classmates. In accordance with this period, the setting of this unit is to put that experience to live and let them do an activity. Here they will learn how to ask and answer about what something is right in front of them as well as learn about animals, vegetables, and finally have a quiz tournament at the end of the unit. Using all the experience and knowledge they've learned, the students will do an activity on their own.

Going towards the quiz tournament, a video quiz, hint quiz, kanji quiz and several more will be held. This is designed for the students to be interested by the last activity. But, what is on the page is only one example.

Script

Let's Play 1

- ① What's this? A nest? Yes, it's a nest. (春 : カラスの巣)
- ② What's this? A gorilla? No, it isn't. It's a spider. (夏 : クモ)
- ③ What's this? A face? No, it isn't. It's a moth. (秋 : ガの羽)
- ④ What's this? A tree? Yes, it's a tree. Look, an owl in the tree. (冬 : フクロウ)

Let's Chant: What's this?

What's this? What's this? What's this?
It's a dog! It's a monkey! It's a tiger!
Wow, that's right!

In accordance to the students interest, be careful of a setting that always make the students say "What is this?!" We want the students to make a fun activity together.

- ★ At the end of this unit, the students will make a quiz about things around them, and they will then quiz their friends. In the textbook, there is a video quiz, hint quiz, kanji quiz, footprint quiz and others to give the students experience. There is also a "Black Box" quiz and gesture quiz which will act as an example for the activity so the students will know what kind of quiz they want to do. Other than that we want to consider the level of the class and plan accordingly for a fun activity.

- ★ On the first page there are 4 different things hidden in the page. For example, at first glance you see a face on the stomach area of the spider. We expect the kids to think "What is that?" When they look at the things inside the big glasses. There the teacher should say "What's this?" The students will probably answer in Japanese.

While trying to bring out the answer it is okay to introduce phrases such as "What's this?" And "Owl."

Let's Play 1

Look at the things pictured in the bug glasses and guess what they are.

- ★ In this quiz the students will look at the screen and guess what everything is. The teacher should use words such as, "What's this?" and "Can you guess?" Because we are expecting the students to answer in Japanese, please repeat what they said but in English. In order to encourage and keep their interest the teacher should say things like, "That's a good idea! That's right!"

- ★ The teacher should see how the students are doing and can stop the video in the middle and give them hints. We want the students to feel that they came to the answer with their own power. By doing this it will increase their drive to keep learning.

Let's Chant: What's this?

- ★ A video that will make the students say "what is that?" will be played. Like answering a quiz, you can have the students say with rhythm. Once the students have gotten used to it, you can have them make their own.

指導者の表現例

Can you guess? (何かわかりますか。)
That's right. (その通りです。)
Look at this picture.
(この写真を見ましょう。)
You can say it in Japanese.
(日本語で言ってもいいですよ。)
How do you say ~ in Japanese?
(~を日本語で何と言いますか。)

主にLet's Play 1で使う表現例を紹介しています。

Let's Play 2

Watch the video, guess what they are.

- ★ The silhouettes of vegetables will appear on the screen, in this quiz the students will guess what they are. In unit 4 the students learned about vegetables, these are very close to the students daily lives, we want to have a fun activity. Rather than just the pictures posted on the page, the teacher can quiz with their own pictures of vegetables and fruits by taking pictures of just one part or of a cross section.

Activity

①Hint・Quiz

- ★ Listen to the hints about the things on the page. This activity is guessing what these are, but before that the teacher should give a quiz to show the students how it will go thusly increasing their motivation.
- ★ Once gotten used to, you can have the children's experience giving hints. Because this is their first time to take an English class, thinking of hints on their own will be very difficult, having them do it in pairs or groups is fine.

- ★ By giving many hints for one item their vocabulary will expand. Also the students can choose words that they have learned from previous lessons (fruits, sports, etc.) and use them in order to deepen their understanding.

②Kanji Quiz

- ★ First, ask the students how to read the kanji. The students may say "umi (ocean)" or "hoshi (star)." There the teacher should give the hint, it's an animal that lives in the sea. If the students think of a star shape that lives in the sea, they should say "hitode (starfish)." After this please tell them the answer in English.

- ★ Compare both Japanese and English readings, we want the students to see the similarity and difference in Japanese and English words.

- ★ You can also talk about how kanji has definite

It's a rabbit. It's a rabbit's footprint.

What's this?

It's an elephant. It's an elephant's footprint.

meaning where as an English letter has definite sound.

③Footprint Quiz

- ★ The footprints of familiar animals acting as hints, the students should be interested in the activity. We want to do the activity while using questions such as "Can you guess? Really? Do you like cats?" with the students.
- ★ Using quizzes that they have experienced or their own original quiz it will be fun to have a quiz tournament. The ALT can introduce it, or have quizzes between grades, please do it appropriately depending on the level of the class. By choosing phrases they have learned and using them here, their understanding will deepen.

指導者の表現例

Let's do the chant in a clear voice.

(はっきりした声でチャンツをしましょう。)

What's this?(これは何ですか。)

It's an owl.(それはフクロウです。)

Do you know *fukuro* in English?

(「フクロウ」は英語で何と言うか知っていますか。)

You can say it in Japanese.

(日本語で言ってもいいですよ。)

Can you guess?(分かりますか。)

Do you need hints?

(クイズを作りましょう。)

Good job.(よく頑張ったね。)

主にLet's Play 1やActivityで使う表現例を紹介しています。

9 Who are you?

Lesson Objective (5 Hours)

- To see the difference in sound and rhythm of English and Japanese, as well as getting used to asking and answering questions.
- By listening to the story book, understand most of the content.
- To listen and react while listening to small stories, be able to copy phrases in order to tell their partner something.

Language Content

○ Are you (a dog)? Yes, I am. / No, I'm not. Who are you? I'm (a dog). Who am I? Hint, please.

○ who, Animals (cow, dragon, snake, tiger, sheep, chicken, wild boar), Feelings• Conditions (long, shiny, scary, round, furry), Body Parts (head, eyes, ears, nose, mouth, shoulders, knees, toes)

[Prev. Covered] Greeting • Self-Introduction, I like (blue). Do you like (blue)? Yes, I do.
/ No, I don't. What (sport) do you like? How many (apples)? are, not, Color, Shape, Conditions • Feelings, Animals, Fruits • Vegetables, Food, Numbers (1 ~ 30)

Unit Content

Listen to a short story and understand most of the content.

This is the last unit for the 3rd graders. This year in their English class, the students have done activities while learning about life abroad, different cultures, many words and expressions. Their understanding of vegetables in their area has also grown, they have gotten used to and gained confidence in listening to and speaking English. From all of this we want to sum the year up and let them try to listen to and understand a short story. We want them to gain confidence when they listen and realized they somehow understood what was going on. In order to do this, the teacher will need to use gestures and many other things to tell the students the content of this story.

In the story book there are many animals very close to the students. Because the story progresses with the hidden animals thoughts, the students will be interested in the story. In the final activity the students will choose one animals lines and pretend to be them, they can use paper puppets, make a quiz or even their own original story. What's important is to appropriately sum up the year according to the level of the class.

Here is the storybook's QR code for the audio.

★ In this unit, we want an image of opening a storybook. This story takes place in a forest in fall. The animals are playing Hide and Go Seek (Oni Gokko). If The dog that is "it(Oni)" sees a part of the other animals he says "I see something..." And then he guesses who they are by saying "Are you a ...?" He continues to look for his animal friends.

★ In this story the phrases "I see something ..." and "Are you a ...?" are used many times. We expect the students to connect the sounds to the meanings by assuming what it means through context and seeing a real situation where it is used.

★ The students will follow the story and listen while guessing what the animals are. Also by continuing on the students will be excited to see if what the guesses was correct or not.

★ In this unit there is an activity where the students choose their favorite line and say it. We want them to have fun facial expressions depending on the scene. Furthermore, to expand the activity, you can have the students freely make their own story and present it. They can also use quizzes they learned from the quiz tournament. For example, the student giving the question has an envelope and only one part of the animal is showing from the envelope while saying "Who am I?" The other students will predict by saying "I see something ..." "Are you a ...?" And then the first student will answer the question by saying "Yes I am. I'm a"

★ This is the final unit of the 3rd grade. We want to inspire the students for 4th grade by letting them use all of the expressions and words they learned and by having a fun activity with their friends in class.

<Read a picture book about Foreign Language Activities >

★ When it comes to communication, giving the students many chances to listen and understand their partner is very important. There the students must plan their listening, read and listen to the storybook. By the students picking up the information in the story book, the students will practice understanding a situation while listening to English. Also, depending on the book, the students can experience things that could never happen in real life, and if it's the opposite the students can enjoy themselves by reading a story close to them. Because of these things, as a second language activity there will be storytelling. Also, in groups by creating their original stories, acting or using paper puppets, their understanding of the story and vocabulary will deepen.

<How to read the picture book >

★ When it comes to storytelling for a second language activity, we should be careful of the following.

- The teacher should add gestures, and use many facial

●In the Autumn ForestとWho are you?

"In the Autumn Forest" was recorded in the digital resource that was handed out to all Elementary schools in 2016, this is the long 32 page version. In this activity, for the digest version we added "Who are you?" to the title. In this unit after the students get experience with the digest version, we can read the long version too. After having read the story to the students the teacher should say "Look! I have 'In the Autumn Forest.' What story is this? Let's read it." And the students will be surprised and respond happily with "Yes, Let's!"

In the long version there are phrases words and situations not in the digest version. For example the Dog who is "it" asks each animal "Are you a~?" And they respond "Oh, my ears. Yes, I am. I'm a rabbit." They will say one part of them then introduce themselves. In this chapter we can deal with body parts that are in the long version of the story. You can sing "Head, Shoulders, Knees And Toes" to go over the new words in a fun way.

Expressions this is very important for the students to learn and understand.

- Instead of just reading what's in the book, ask students about the pictures so that they get sucked into the picture books world.
- When turning the page, ask 「What will come next」 so they stay interested. By doing this, students will think about what will be next, take interest and listen to the teacher's story.

指導者の表現例

What can you see?(何が見えるかな。)
Let's listen to the story.
(お話を聞きましょう。)
What is the dog doing?
(犬は何をしていますか。)
Can you find something white?
(白いものを見つけれられますか。)
What's this?(これは何でしょう。)
Let's say it together.
(一緒に言いましょう。)

主に絵本の読み聞かせの際に使う表現例を紹介しています。

<Chain・Game> This is not on the page.

- ★ make circles (or rows) of 4 students and they become a team. The second student asks the first "Who are you?" The first student chooses an animal and says "I'm ~." The third student asks the same thing to the second student. The second student make say the animal the first student said and their own. (For example, Dog![the person before] I'm a cat [their own]). Next, the third student and the last student have the same conversation. Finally the last students says the rest of the groups answers and then theirs.

ヘボン式と訓令式

小学校学習指導要領国語科では、「第 3 学年においては、日常使われている簡単な単語について、ローマ字で表記されたものを読み、ローマ字で書くこと」を指導することとされている。また、日常使われている簡単な単語とは、地名や人名などの固有名詞を含めた、児童が日常目にする簡単な単語をさしており、このローマ字表記にあたっては、「ローマ字のつづり方」(昭和 29年内閣告示)を踏まえることとなる。

それによると、「一般に国語を書き表す場合は、第 1 表に掲げたつづり方によるものと」し、「従来の慣例をにわかに改めがたい事情にある場合に限り、第 2 表に掲げたつづり方によってもさしつかえない」こととされている。第 1 表とは、いわゆる訓令式によるもの

であり、この表記の指導にあたっては、日本語の音が子音と母音の組み合わせで成り立っていることを理解することが重要である。例えば、児童に「かー」と発音させ、「かー」から「ア」という音を取って発音するよう指示する。児童は何度か試みているうち「[k]」という音を出すであろう。それが、kの音であり、「か」は[k]と[a]という音が組み合わさって成り立っていることを実感させるなどするとよい。

一方、第 2 表のいわゆるヘボン式と日本式による表記の指導にあたっては、例えば、パスポートに記載する名前の表記であり、外国の人とコミュニケーションを図る際に用いることが多い表記であることを指導するようにする。
